

Solar urticaria in the visible spectrum successfully treated with astemizole.

Monfrecola G¹, Nappa P, Pini D.
Dermatologica. 1990;180(3):154-6.

Three cases of solar urticaria in the visible spectrum successfully treated with astemizole, a H1 antihistamine, are reported. The administration of 10 mg a day of the drug increased the minimal urticarial dose from 2 to 12 times.
