AIP Conference Proceedings

Volume 1020, Issue PART 1, 2008, Pages 216-223

2008 Seismic Engineering International Conference Commemorating the 1908 Messina and Reggio Calabria Earthquake, MERCEA 2008, Reggio Calabria, Italy, 8 July 2008 through 11 July 2008

Probabilistic simulation of territorial seismic scenarios (Conference Paper)

Baratta, A., Corbi, L.

Department of Structural Engineering, University of Naples Federico II, Via Claudio 21, 80125 Naples, Italy

Abstract

The paper is focused on a stochastic process for the prevision of seismic scenarios on the territory and developed by means of some basic assumptions in the procedure and by elaborating the fundamental parameters recorded during some ground motions occurred in a seismic area. © 2008 American Institute of Physics.

Author keywords

historical earthquakes; Seismic simulation; site characterization

ISSN: 0094-043X ISBN: 978-073540542-4 Source Type: Conference Proceeding Original language: English

DOI: 10.1063/1.2963838 Document Type: Conference Paper

Sponsors: Municipality of Reggio Calabria, Regional Council of Reggio Calabria, Regional Province of Reggio Calabria, Mediterranean University of Reggio Calabria, Faculty of Engineering of Reggio Calabria
