Received: 17 January 2020; Accepted: 21 February 2020; Published: 24 February 2020

The exponential factor in Equation (1) of the paper published in *Materials* [1] reports a misprint and the correct expression of the transmission function is

$$\widetilde{T}(\omega) = \frac{\widetilde{E}_f(\omega)}{\widetilde{E}_s(\omega)} = 2\frac{\widetilde{n}_f(\widetilde{n}_a + \widetilde{n}_s)}{(\widetilde{n}_f + \widetilde{n}_a)(\widetilde{n}_f + \widetilde{n}_s)} exp\left\{-i\left(\widetilde{n}_f - \widetilde{n}_a\right)\frac{\omega t}{c}\right\} FP(\omega) \quad (1)$$

where

$$FP(\omega) = \frac{1}{1 - \left(\frac{\widetilde{n}_f - \widetilde{n}_a}{\widetilde{n}_f + \widetilde{n}_a}\right)\left(\frac{\widetilde{n}_f - \widetilde{n}_s}{\widetilde{n}_f + \widetilde{n}_s}\right) exp\left\{-i\,2\,\widetilde{n}_f\frac{\omega t}{c}\right\}}$$

These changes have no material impact on the conclusions of the paper.
The authors would like to apologize for any inconvenience caused to the readers by these changes.

Conflicts of Interest: The authors declare no conflict of interest.
